Hello! Thank you for your interest in our web development services. We focus on building modern websites that are **fast, secure, and entirely free of ongoing hosting subscription fees** by leveraging modern serverless infrastructure.

1. Portfolio & Technical Capabilities

We specialize in constructing high-performance modern web architectures without the burden of heavy server costs:

- HTML5
- CSS3 / Tailwind
- JavaScript (ES6+)
- Google Apps Script
- Netlify Deployment
- GitHub Version Control

Solution / Project	Description & Features	Infrastructure
Custom Web Interface	Development of responsive frontend interfaces based on clean HTML, CSS, and JavaScript (highly optimized for both mobile and desktop screens).	Netlify Global CDN (Free Forever)
Dynamic Dashboard & Database	Seamless dynamic forms and data management pipelines using Google Apps Script connected directly to Google Sheets as a functional backend database.	Google Cloud Ecosystem (No server maintenance costs)
Content & E-Commerce Landing Pages	High-conversion optimized landing pages featuring tracking integrations, clean layouts, and ultra-fast asset delivery.	Netlify + GitHub Version Control

2. Services & Pricelist

Below are our structured packages, tailored to match your specific business requirements. All plans native-include free lifetime cloud hosting.

Package Name	Inclusions (What's Included)	Investment
Starter Landing Page	• 1 Custom Premium Landing Page Design • Original HTML, CSS, and JavaScript source code • Setup & deployment to Netlify.app • Fully responsive design layout (Mobile-friendly) • Direct WhatsApp button & Social Media integration	IDR 750,000 / \$50 USD
Business + Data Integration	• Up to 3 fully integrated web pages • Interactive contact / order placement forms • Google Apps Script backend integration • Automated real-time data streaming to Google Sheets • Free lifetime hosting configuration on Netlify	IDR 1,500,000 / \$100 USD
Custom Dashboard & Executive System	• Bespoke Custom Web Application • Interactive Analytics Dashboard web interface • Complete CRUD systems powered by Google Apps Script • Basic script security encryption layer • Free custom domain binding (upon domain availability)	IDR 2,500,000+ / \$165+ USD

Key Advantages of Our Architecture:

- **Zero Recurring Hosting Costs:** Websites hosted on Netlify offer world-class speeds and include an automated, free SSL (HTTPS) certificate without renewal fees.
- **Flexible & Accessible Database:** Utilizing Google Sheets + Apps Script allows you to view incoming data in real-time from anywhere without complex tools.
- **Maximum Performance:** Custom code structured from scratch without heavy templates or bloated third-party CMS plugins.

3. Project Workflow & Terms

- **Consultation & Scope:** Discussing concepts, data models, structure, and user journeys.

- **Development Phase:** Writing original frontend files (HTML, CSS, JS) and configuring Google Apps Script workflows.
- **Review & Deployment:** Live site uploading onto Netlify staging under a *your-brand.netlify.app* subdomain or a custom domain.
- **Handover:** Complete administrative delivery of the GitHub repository, Netlify account access, and documentation for the Google Sheets system.

Ready to launch your project? Let's discuss details:
